# Examen de Test Unitaire en Python

### Question 1:

## Question 2:

### Question 3:

```
C:\Users\DÈVELOPPEUR\Documents\yepa\python\python_examen>python -m unittest -v question3.py
test_deposer (question3.CompteBancaireTest.test_deposer) ... ok
test_obtenir_solde (question3.CompteBancaireTest.test_obtenir_solde) ... ok
test_retirer (question3.CompteBancaireTest.test_retirer) ... ok
test_retirer_solde_insuffisant (question3.CompteBancaireTest.test_retirer_solde_insuffisant) ... ok

Ran 4 tests in 0.008s

OK
```

# Question 4:

```
C:\Users\DÉVELOPPEUR\Documents\yepa\python\python_examen>python -m unittest -v question4.py
test_liste_negatifs (question4.TestSommeListe.test_liste_negatifs) ... ok
test_liste_plusieurs_elements (question4.TestSommeListe.test_liste_plusieurs_elements) ... ok
test_liste_un_element (question4.TestSommeListe.test_liste_un_element) ... ok
test_liste_vide (question4.TestSommeListe.test_liste_vide) ... ok
test_melange_positifs_et_negatifs (question4.TestSommeListe.test_melange_positifs_et_negatifs) ... ok

Ran 5 tests in 0.008s

OK
```

### Question 5:

```
C:\Users\DÉVELOPPEUR\Documents\yepa\python\python_examen>python -m unittest -v question5.py test_calculer_perimetre (question5.TestRectangle.test_calculer_perimetre) ... ok test_calculer_surface (question5.TestRectangle.test_calculer_surface) ... ok

Ran 2 tests in 0.003s

OK
```

### Question 6:

#### Question 7:
